Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Montgomery (3,426,447).

Montgomery discloses in Fig. 1, 3 and Attachment I, a book comprising a front and back cover (16), a plurality of pages (12) therebetween, and a spine (A); wherein the pages and covers

comprise a left facing surface (B) and a right facing surface (C, see Fig. 1 and 2 of Attachment), wherein graphical characters on the surfaces are configured in an upright position on the right facing surface (C) and are inverted on the left facing surface (B); wherein the graphical characters are written in a single language (English).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Montgomery in view of Rice (3,153,861).

Montgomery discloses a book comprising all the elements as claimed in Claims 1 and 2, and as set forth above. However, Montgomery does not disclose wherein the graphical characters are the same.

Rice disclose in Fig. 1, and in Col. 2, lines 54-65, a book comprising graphical characters on adjacent page surfaces, which are the same but inverted.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Montgomery's book with inverted graphical indicia on

adjacent facing pages as taught by Rice for providing a self checking mechanism for initially concealing responses (inverted).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sadler, Roberts et al, Stavens, Simon, Herbert, and Robert et al ('732) disclose similar books.
